

# Schindler 3000

Stylish, comfortable and easy

**Jardine Schindler**

**Schindler**

With the  
Schindler  
3000

enjoy an easy,  
smooth journey

With distinctive designs and **swiss-engineered components**, the Schindler 3000 is a perfect – and practical – solution for residential buildings, hotels and small commercial projects. Take advantage of leading energy-efficient technologies and digital services, all in an economical package. Give your passengers a **smooth, safe, and comfortable ride.**

# Schindler 3000

## Stylish, comfortable and easy

Schindler 3000 offers easy and tailored options to make it the perfect fit for low- to mid- rise buildings. With a maximum travel up to 75 meters, speeds up to 1.75 m/s, and a capacity of up to 1150 kilograms, it has been specifically and economically designed to meet the demands of hotels and residential buildings.

Schindler 3000 is designed, engineered and rigorously tested to ensure smooth, quiet and efficient operation throughout your elevator's long life cycle.

### Key figures

<b>Capacity</b>	400–1150 kg
<b>Travel height</b>	Up to 75 m
<b>Stops</b>	Max 25 stops
<b>Speed</b>	1.0–1.75 m/s
<b>Machine room</b>	Machine-room-less
<b>Drive system</b>	Frequency controlled, eco-friendly regenerative drive technology
<b>Group size</b>	Up to 4 cars
<b>Entrances</b>	One- or two-sided
<b>Interior</b>	3 interior design lines, fresh wall colors and wide range of fixtures, and bare car option
<b>Energy efficiency classification</b>	Class A, according to ISO 25745-2*

\*The classification always refers to a specific customer configuration. Usage pattern, load capacity, customer specific options and site conditions influence the final rating.

### Designed for comfort

Engineered to Swiss standards for 24/7 operation and smooth ride comfort.

### Accessibility for all

EN81-70 options help to enable a comfortable and simple journey for all users.

### Engineered for value

Options and components have been selected and tailored to meet the demands of low- to mid-rise buildings.

### Excellent ecological performance

Regenerative drive technology helps reduce travel energy by up to 30%, compared to conventional technology.

# Future-ready

## Schindler elevators designed for next-generation technologies

Our elevators are designed to use state-of-the-art technologies from planning to operation. Benefit from our tools, solutions, and latest innovations that have been designed to support you through the entire life cycle of your elevator.

### Plan & Design online

With just a few clicks, you can plan the right elevator for your building. Our online Plan & Design Tool provides you with recommendations, comprehensive product specifications and detailed layout drawings and Building Information Modeling (BIM) files.

### Innovations in installation

Schindler's new INEX (Installation Excellence) method not only reduces construction preparation and resources for our customers, it also improves safety and efficiency on site.

Our autonomous self-climbing robot system – Robotic Installation System for Elevators (Schindler R.I.S.E) – will enhance the quality of the elevator installation while maintaining safety on site in the near future.

### Smart operation – switching to digital

All our new elevators are fully enabled for **Schindler Ahead** – our IoT (Internet of Things) portfolio of services. With Schindler Ahead, we make sure that our customers can step confidently into the digital era.

- **Maximize uptime with Schindler Ahead Remote Monitoring**  
With digital connectivity, issues can be detected and addressed well before service is affected. This helps facilities take timely action to minimize or even avoid downtime.
- **Real-time insights with Schindler Ahead ActionBoard**  
Ahead ActionBoard provides operational, performance and commercial information in real time, giving customers clear, instant oversight of their entire elevator and escalator portfolio.

### User experience on a next level

Schindler Ahead MediaScreen, an in-car media solution, provides relevant information to the riding public in real-time, with minimal effort and maximum attention. Share building updates, news, weather and entertaining content to keep passengers informed.

Elevator planning and design in minutes with Schindler Plan & Design Tool

Innovations to help seamless installation – meet Schindler R.I.S.E.

Get real-time insights with Ahead ActionBoard.

Make paper communication a tool of the past with Schindler MediaScreen.

# Elevating sustainability

## Excellent ecological performance

We're committed to improving the environmental impact of our products and services continuously, across their entire life cycle. The Schindler 3000 elevator features compact, lightweight, and durable components that optimize material usage and energy-efficiency during operation.

### Class A energy-efficiency rating

Improving energy efficiency is essential in order to reduce the environmental impact of elevators and the buildings they serve. Regenerative drive, LED lighting and stand-by mode while parked, are standard eco-friendly features in all Schindler 3000 elevators, aiming to achieve the highest energy-efficiency rating class A, according to ISO 25745-2\*. A Schindler 3000 is enabled for remote connectivity to improve service efficiency and reduce unnecessary trips to the installation.

### Environmental Product Declarations (EPD)

To provide an insight into the ecological performance of our elevators throughout their life, we provide Environmental Product Declarations (EPD). We've registered EPDs at the "International EPD® System" for all major elevator product lines. This is an important step in the assessment of the environmental performance of our products and underlines our continuous efforts toward sustainable solutions.

Energy-efficiency rating  
class A, according to  
ISO 25745-2\*

\*The classification always refers to a specific customer configuration.  
Usage pattern, load capacity, customer specific options and site  
conditions influence the final rating.

# Tailored for you

## Less space, more capacity

Schindler 3000 has outstanding options and features to meet the ecological and economical demands of residential, hotel, and small commercial projects. Less space for components, more room for you to use profitably.

### 1 Machine-room-less design

All main drive, traction and control equipment sits in the shaft, leaving architects and designers free to use the extra space for more productive purposes. And thanks to the compact gearless machine, a larger car can be fitted into a standard shaft space, reducing headroom space and pit depth.

### 4 More usable building space

Less space for components, more usable building space and more room for passengers. Schindler 3000's innovative platform ensures that a standard-sized shaft can carry a wider car with bigger load capacity and allows for a reduced pit.

### 2 Smaller motor and traction sheave

Schindler's Suspension Traction Media (STM) system guarantees a quieter, smoother ride and does not require any oil or lubricant. STM also saves shaft space because of the smaller motor and traction sheave – 70% smaller than traditional systems. For passengers that means a better ride, while building owners will appreciate the increased reliability and efficiency.

Permanent magnet technology offers higher energy efficiency and a stable start without high peak current, quickly enables the elevator to reach a low energy consumption state.

### 5 Energy efficient technology

A regenerative inverter helps you to cut operational costs by reducing energy consumption. While conventional inverters dissipate the brake energy on brake resistors – thus wasting valuable resources and heating the machine room – Schindler regenerative inverters return brake energy to the building's electrical devices or into the grid. This minimizes energy consumption and reduces the cooling requirement in the machine room by up to 50%\*.

\*Depending on the configuration of your final elevator.

### 3 Built-in, digitally-enabled controller

Schindler 3000's controller is built directly into a standard door frame at the top landing. This solution simplifies elevator installation, provides easy access, and saves space.

This digitally-enabled controller can support remote monitoring and maintenance of the elevator after it is turned over for service.

# The sound of moderate rainfall

Thanks to our high-quality technology and installation methodologies, Schindler elevators generate minimal noise. Most of the noise created by our elevators does not exceed 50 – 60 dB (A).\*

\*For the evaluation methodology, we comply with ISO 18738 standards. However, many factors influence the amount of noise and vibration generated by an elevator. See our Ride Quality brochure to learn more.

Define your style  
with our

# design lines

The Schindler 3000 offers fresh colors, robust flooring, and unique ceiling designs. Combine colors, materials, lighting, mirrors, handrails, and fixtures to achieve the ambiance that fits your building. Bring your style to life with the different design lines.

# Navona

## Functional and durable

Clarity and comfort in your car with this robust design line. Fresh colors, durable accessories, and the option of several different floors make Navona an excellent choice for residential applications. Elegant stainless steel options are also available for rear and side walls.

### Navona

Lighting: Round Spots

# Mirrors

## Ensuring optimal appearance

Mirrors heighten the sense of space, depth, and comfort in elevators – and provide a vital service for passengers. Your elevator can be fitted with a full-height or half-height safety-glass mirror on the side or rear wall of the car.

### Side Wall

Half height centered

Full height centered

### Rear Wall

Half height centered

Full height centered

# Handrails

## A wide choice of shapes and finishes

Handrails convey a feeling of security. Schindler stainless steel handrails are designed to blend with car interiors, shapes and textures, and can be mounted to the side and rear walls. Available in curved, straight, straight with curved ends, and revolving layouts.

### Customize your handrails

Handrails convey a feeling of security. Our handrails are designed to blend with car interiors, shapes and textures.

The handrails can be mounted in different combinations of side and rear walls, either only one handrail piece on the rear or side walls, two handrail pieces on the side walls or handrails on three walls. They can be connected straight or revolving.

Choose the handrail shape you prefer:

Straight, straight with rounded ends, or curved

# Installation and service excellence

## Working with you every step of the way

### Transparent fulfillment process

For more than a century, we've have focused on supporting our customers across all stages of a project. From design and installation, through to service and modernization, our professionals are there for you, at all times. We partner with you to find the best mobility solution for your facility.

We will consult with you prior to the offer and throughout the manufacturing and installation process to address any unforeseen challenges. A detailed inspection will be performed before we hand over the elevator to verify that the unit meets our high quality standards.

Our aim is to ensure the Schindler 3000 delivered and installed, perfectly fits your needs.

### A new era of service for elevators

With a new Schindler 5000, your equipment becomes easier to service and troubleshoot thanks to the latest digital technologies. And with more than 40,000 experts around the world, we strive to ensure every Schindler customer enjoys industry-leading uptime with minimal disruption.

Remote monitoring and automatic fault resolution are ready to be enabled in your Schindler 5000 elevator. A newly connected elevator supports 24/7 intelligent auto callback service and maintenance. This can reduce downtime by up to 34%\*.

\*Compared to non-connected units.
